Autodesk acquired rival software developer Alias Systems Corp. in 1995 and has continued to develop AutoCAD since. In 2000, Autodesk acquired other software companies including Alias, Data Design, Dimensional Technologies, and MicroArt. Autodesk was founded in 1954 as a software company. It developed the first mechanical design software for the time (AutoCAD), followed by architectural and engineering CAD software. More than 14 million more people are registered to vote in 2016 than in the last midterm election in 2014, according to the latest figures from the U.S. Election Assistance Commission. That's even higher than the 12 million people registered for the 2010 midterm election, which was the highest in U.S. history. "The increased interest in voting by citizens in every state should give us pause," said Jenn Smolowitz, spokeswoman for the National Vote at Age Coalition, a group of advocacy groups representing older people who want to vote. "For those who want to be successful in the age of automation, we must preserve the right to vote," she said. "We do not want to let the country go through another wave of voter suppression." The increase is being driven by higher turnout from young people, nonwhite voters and first-time voters. Get Breaking News Delivered to Your Inbox In a statement, Presidential Commission on Election Administration said the turnout among young voters is especially notable. "The increase in youth and student registration is a hopeful indicator that the youth vote will be as strong in 2016 as it was in the last presidential election," said Trump's commission member Matthew Dunlap, the former director of the Pew Charitable Trusts' Election Initiatives. The numbers show that there's an active electorate out there. A record number of Democrats and Republicans are running for president, and millions of people are registered. The number of registered Democrats is up 17 percent from 2014. Republicans are up 3 percent. But turnout is spiking among young people and non-whites. Youth turnout in midterm elections is up 29 percent

from 2010, and non-white turnout is up 19 percent. "Younger voters will play a central role in the outcome of this year's congressional races," said Michael McDonald, a political science professor at the University
