KEYMACRO helps you easily create and convert macro commands for Microsoft Office. In addition, it can save macros to VBE project files, which means that the macros can be executed in Microsoft Word. KeyMacro is the first Microsoft Office plugin that allows you to select macros from lists. You can create your own list with any name. The included basic lists have the following functionality: 1. Lists with specific lists, such as "My Tools", "My Programs", "My Files" and so on. 2. Lists with installed programs. 3. Lists with installed applications, such as "My Fonts", "My Graphics", "My Files", "My Utilities" and so on. 4. Lists with installed languages, such as "My Languages", "My Files", "My Graphics" and so on. 5. Lists with system settings, such as "My Services", "My Printers", "My AutoCorrect" and so on. 6. Lists with network locations, such as "My Network", "My Email" and so on. 7. Lists with IP addresses and other properties, such as "My Network", "My Computer", "My Documents", "My Internet Explorer" and so on. KEYMACRO also allows you to create shortcut keys to your macros and to paste the created macros to the ribbon of the Microsoft Office applications. KeyMacro also provides you with an "Up" button for moving up one row or one column to select the items in a list. The "Down" button is used to select items from the list in the active cell. A copy / paste button allows you to copy the active cell content to the clipboard and to paste it to the current cell. Additional functionality: 1. Various shortcut keys. 2. The ability to sort the macro lists. 3. The ability to filter the macro lists. 4. The ability to preview the selected macro in the active cell. 5. The ability to replace selected text in the active cell with a macro. 6. The ability to change the background color of the macro names in the macro lists. 7. The ability to disable a specific key combination and to define a key combination to toggle the list selection mode. 8. The ability to define a macro to select the currently opened documents. 9. The ability to define macro conditions (multiple selection, criteria and loops). 10. The ability to define and apply macros to the ribbon of

KeyMACRO is a PDF PDF file open and encryption and print PDF files in Mac OS X. KeyMACRO is a free program to open encrypted PDF files, the file is stored in the format of ISO image.
