Shut Up! Timer

Shut up! Timer is a small software application designed specifically for helping you shut down or restart the computer, or log off the current user with the aid of a countdown timer. It comes in handy especially when you need to shut down the computer after downloading files from the Internet. The advantages of being portable Since this a portable program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to schedule a shutdown session on the breeze, without having to go through installation steps. Simple looks Shut up! Timer implements an intuitive behavior, so you can easily discover and tweak its functions. It was designed with an overall simplicity in mind, so it embeds only a few dedicated parameters that you can play with. Scheduling a shutdown session The application gives you the possibility to pick the action that you want to trigger, namely shut down or restart the computer, log off the current user, or opt for a forced shutdown mode. What's more, you can specify the time in hours, minutes, and seconds, turn off the monitor, as well as check out the remaining time displayed in the main panel. Performance Shut up! Timer accomplishes a task very quickly and without errors. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. Since the entire process seems nothing more than a piece of cake, even less experience users can learn to master it in no time. Bottom line All in all, Shut up! Timer comes bundled with several handy features for helping you schedule your PC to shut down, and is suitable for all types of users, regardless of their experience level. Expert: Timer is the best shutdown scheduling tool. Price: Free! Free Trial Download: Click here to download a 30-day trial of this software application. Our goal is to give you all the tools necessary to fulfill your professional goals, maximize your success, and turn your passion into a thriving business. The Apple TV is basically a mini-console in the living room, streaming content from your iPhone, iPad or Mac. However, the latest version allows you to stream content from Netflix, Hulu and other online content services. Using the remote, you can browse through the content you want to view,
