Aircraft Sketch Shooter is a game with many different challenges to tackle. The aim of the game is to Destroy the Boss and reach a highscore. During your trip in the sky a Battle is happening in one of 15 Airfields and you need to battle with a Boss who tries to finish you. The each Boss is different and you will have to face them with the appropriate Aircraft. After defeating a Boss you have to complete a challenge in order to face another Boss. The only limitation is your Time! If you work too fast the Boss can finish you. In order to Speed Up the Game you can use Power Ups or Power Downs. Answers to questions will be posted in the comments section of the latest Airfield Challenge or the highest Highscore. If you are stuck with an Aircraft or Boss and want help here is a list of answers to all common questions and problems you will face during the game. Where do I get the Aircraft? Each Aircraft is available in three Modes. The Modes are the Pilot, The Ground Crew and the Bomb Loader. The Pilots Mode: Aircrafts can be purchased in Pilot mode with Money and Medals. You start with a default Aircraft which works on Manual Flight and cannot be upgraded. You earn Medals for each destroyed Boss. The Ground Crew: Each Airfield which holds a Boss has several Ground crew. When the Battle starts a Ground crew spawns and walks to the Boss. He will stop at a Station and pull a switch with a green light. After several seconds the colored light will turn into a Dark gray Light. After that if the Boss is still alive the Ground crew picks up a Weapon and shoots at the Boss. Each shot takes the Boss under a hit. If a Boss is no more left you get your Medals for this Boss. The Bomb Loader: When the Boss is destroyed the Ground crew drops a Bomb and the Player just needs to activate it. A Bomb is picked up by the player and throws the Boss further away from the Player. After Throwin the Bomb will be defused and some seconds will pass. During this Time the Boss still comes closer to the Player. If the Bomb is defused you get your Medals for this Boss. The Switch Button is the Pilots Mode: Left on top of the Controller is the Pilots Mode Toggle. Hold it until the Pilot Mode is on. You can switch

What's new in Ballistic M.A.D.ness:

Community Council). Political infighting of the Council members was never an issue in the Haeven community. It seems the main reason of its split was the retired governor's stern interest in Dutch natural and cultural heritage. At that time I was a nobody, just another teacher living in Kavieng District, and, therefore, was greatly surprised that I was sent to Brussels in March to represent our community at a very high level. Even more surprising was the unexpected invitation to study on independent candidate for the next-president role. Hefty and efficient director of the Council - Mr. Don Hammond - has, as i can see, done remarkable work in Nova Zeland and, after the request of my personal request, I am very proud to become president of Nova Zeland Trust for the International Protection and Preservation of Monuments of the Past and the Council of Yap. The project of Mr. Don Hammond was nothing compared to his brilliance in Kavieng. The least of all things, Nova Zeland Trust is a very slick organisation for now and for the future. Preserving the Yap culture never became a real problem; it was more general because of the natural disaster. Above all it is a typical example of how other communities, both in Hong Kong and in the UK, can unite in a very harmonious manner to preserve their own heritages. I feel special to be a member of the 'Nova Zeland' corporation and, beyond that, the heritage of the old Pacific.
