The city is out of control, between being corrupt and ruled by drugs and gangs, this has resulted in a depressed economy and is now clearly on the way to collapse. Gang activity has become so bad that it has now moved into the underworld and there are gangs all over the place selling their wares. These gangs range from the local big guns who can call in firepower from across the city to the low level gangs that just want to sell drugs and sometimes rape and rob. With gangs all over the place it is your job to eliminate them and ensure that you are the only one that survives. As a bounty hunter, you are the go to guy when it comes to paying for 'local protection' from the gangs, however they have grown so big, that they now pose a threat to your missions. You can send players to do the dirty work if you are in a "distressed location", making money is not a priority unless you are doing a mission to kill a gang leader. Players can become "Vessels" which are fairly expensive, but this gives you a lot of fun bonuses. Vessels are paid per encounter, they can only see the same gang members twice. Let's say a gang leader calls his boys to gather, they will be in a specific location and will never leave that area unless a mission is due to be cleared. If the gang leader or his team of boys spots a bounty hunter they will instantly call a pursuit, the gang leader will lead the Pursuit if you are out of position the gang leader will intentionally call a chase to make you put your harpoon on the Pursuit. When a gang member is tracking you, you can easily stop them by triggering your Harpoon by pressing the C button when the pursuer is close. This will cause the Pursuit to turn and try and escape, if you let the Pursuit get away, then the gang leader will call you out on his loudspeakers to let you know that he didn't want the Pursuit. If you do not follow his call, the Pursuit will pursue again, if the Pursuit pursues multiple times before you kill them, then it is referred to as a Chase and the gang leader sends multiple gang members to your location. If the gang member feels the need to chase you, it means they are armed and you better be prepared for a fight. Remember, Bounty Hunters is a game where you are paid to kill. The Work is never

Life is a game of holding nothing back, and killing Time at Lightspeed isn't afraid to make that point. Follow the story of one lonely droid and her quest to meet someone she's actually interested in, as she gets pulled into a conspiracy-theory-laden adventure to keep the galaxy and her own existence safe. Killing Time at Lightspeed is a visual novel in which you play a female droid on a futuristic moon. But this is not as it seems: playing the game is an opportunity to discover a conspiracy, uncover the dark secret that looms over your world, and enter into a romance with a handsome space cowboy. And that's just the beginning. Features: • A twisty visual novel - choose the scenario to play, learn of the mysterious events surrounding your moon, and see the end-game results you've worked so hard for • Multiple endings, multiple routes through the story, and extra story scenes based on your decisions and the choices you make • Profanity throughout • Steampunk influence • Meets or beats 19th-century writing and storytelling conventions • High quality illustrations, clean and positive sexuality, and joy in portraying a positive female role-model How to play: There's only one way to play Killing Time at Lightspeed, but if you're not into visual novels, that doesn't matter a bit! The player interface is designed to be approachable without compromising the game's depth. The game involves controlling your male character, who is called "C.C.". This is the first time you will control a male protagonist in a visual novel, so be prepared to discover a few changes to the conventions of the genre. To move the game forward you simply make choices. These can be as simple as yes or no questions, or they can be binary ("Yes, I want to drink this. No, I don't want to drink this"). You will have the opportunity to make many of these choices, but you only control your C.C. in one chapter. If you miss out on a choice it won't be lost for good: you can go back to make that choice again later. You can also end the chapter early by clicking on the chapter menu. Killing Time at Lightspeed is a visual novel - you need no prior experience of this type of game to get started c9d1549cdd

The visuals are amazing, but the game consists of various two thousandths. Really hard to understand the story. The whole game consists of 'push a button, wait for a screen to pop up, press button etc.' Also, too many useless objects and sometimes something doesn't want to work at all. In the end, the game was too short and I'm annoyed. Very good game even for fans of psychological thriller games. The puzzles are in the puzzle category, but they're well done with the story and the atmosphere. The "instincts"
