Slate Digital Coupon for "Summertime Virtual Console", and "The Hall of Fame", will be available soon, and have access to "The VCC's" Auto Air &C To clarify, yes you can use the Virtual Console VCC Channel... Slate Digital Virtual Console VCC Channel Unfortunately, I can't seem to access "VCC's" Auto-air. This helps, but for some reason, the Vocals are coming out distorted and it comes back on when we turn off the VCC channel. Any suggestions? Hi folks, Hope you're all doing well, just got a query, I have the new version of Digital Nirvana's "VirtualConsole" and I have these issues. Whenever the Vocals come out distorted, the CTS for the VCC channel cannot be turned off. Every time, I need to turn the channel off and then back on again to stop the distortion. Is this normal? I'm just trying to understand what I'm doing wrong. Many thanks! Hi I have the Virtual Console 2.0 and I can access VCC's Auto-air, VCC Tune, and VCC Mute, but I have no access to VCC's Assistant/vocalist's voice. I tried sending help then pressing the red button and putting Enter, then it will work to turn it on and off, but I can't access anything else, any suggestions please? Thanks! Hi folks! I have the latest version of Virtual Console 2.0, and I can access the VCC Auto-air, VCC Tune, VCC Mute, and the VCC Assistant too. However, I can't access the VCC's VCC Channel and the VCC Pitch Bend. It has been a while since I've worked with the Virtual Console so I can't remember what I did wrong, but I'm hoping that some of you will be able to help me with this! Thanks! Best Answer You are not alone in this issue. It is of no use trying to access the VCC Pitch Bend. It will not affect your vocal performance. Try the latest version of VCC Air remix vcc-950 or download the slave drive w/1100. The help button works for both versions. I'm a bit new in this world and you just get used to everything. And I believe that
