Mono-Developer is a free software development tool based on.NET architecture. It makes it easier to develop software for Windows, Linux and Mac, and share code and functionality across different platforms. This user-friendly environment will help you make web applications that run on different platforms, Windows, Linux, etc. A special benefit of this approach is that the code can be interpreted using Mono runtime framework - an open source implementation of Microsoft's.NET Framework for the Linux, Unix and Mac platforms. The Mono framework is used to evaluate and execute the C# code written using the.NET platform. Mono Developers will be able to develop software in C# and use the same code across multiple platforms (Linux, Mac OS, Windows, etc.) A library of examples Softwarekv collection of examples and applications is a handy toolkit that was especially designed for programmers who are developing C# applications. The set of samples showcases the capabilities of WinForms code and can be quite useful in learning how to use the code in individual projects. The main goal of Softwarekv collection of examples and applications is to help you understand and learn how to create C# applications. It provides the access to the latest development technologies. The full implementation of the code samples is based on the latest versions of.NET Framework, Mono runtime, C#, Visual Basic, Visual C++, C, Visual Studio, and SQL Server 2005/2008, as well as various databases, reporting services, and other Microsoft technologies. The Advantages of Classic ASP Projects In Your Web Page Classic ASP projects are not frequently used within web sites nowadays as there are many new programming languages with features that web sites can use. ASP projects are useful in web page creation. Such projects can be created easily using Visual Studio 2012 in Visual Web Developer. Moreover, with the addition of Web Matrix in 2012, Classic ASP projects can be easily created in such web pages. Advantages of Classic ASP Projects In Your Web Page ASP projects can be created easily in Visual Studio 2012 and afterwards ASP applications can be easily placed in web pages using the new Web Matrix, a component added to Visual Web Developer 2012. ASP projects are beneficial as they give programmers the opportunity to create web pages and functions with the use of the VBScript language. It is quite useful for programmers that have no experience in web site creation and programming; programming with Classic ASP can be easily learned by them. ASP Projects Benefit Humanized Web Development. ASP projects are very advantageous in creating web pages where the content of the web pages is altered, an action that is needed by programmers who do not have the expertise in coding in other programming languages, such as PHP, Java, ASP, HTML5, HTML, and so on. ASP Projects Enhance Scripting Abilities. With the use of ASP projects, script sections can be easily incorporated into web pages. Scripts are types of text that is placed in web pages, which are usually called JavaScript. Such script language is used to add dynamic features to web pages. For example, a table of Contents can be replaced with the introduction to a web page, and such change is useful in functionality and content of web pages. ASP Projects Enable In-depth Programming. In case programmers are not familiar with other web page coding languages such as PHP, JavaScript, and JAVASCRIPT, Classic ASP programming can be quite difficult. However, with the addition

of new features and functionality in the programming language, Classic ASP programming has become easier. For instance, programmers are now able to write HTML code in the script section of the Classic ASP programming language, which is something that was not possible before the inclusion of the ASP.NET. ASP projects in web pages are advantageous in that they enhance the functionality of web pages by using additional script sections and content. ASP Projects Enable Intelligent Web Development. For programmers to develop programs in Classic ASP, they have to understand that b7e8fdf5c8
